What if all of London were really an amusement park--a whole city returned to Victorian times to entertain visitors from the twenty-first century? That's the wildly original premise of Ian Beck's "Pastworld," a high-stakes mystery set in a simulated past. Eve is a lifelong resident of Pastworld who doesn't know she's living in a theme park until a mysterious threat forces her to leave home. Caleb is a visiting tourist who finds the lawlessness of the past thrilling--until he suddenly becomes a fugitive from an antiquated justice system. And in the midst of it all, in the thick London fog a dark and deadly figure prowls, claiming victim after victim. He's the Fantom, a creature both of the past and of the present, in whose dark purpose Caleb and Eve will find their destinies combined. Page-turning, complex, and haunting, "Pastworld" masterfully exposes the human experience of the past, of violence, of technology, and of entertainment.
