In "Space Wars, Scott, Coumatos, and Birnes created a fascinating war gaming scenario of how World War III might unfold in above the Earth's surface. Now this thrilling team of writers reunites with "Counterspace," "an even more chilling fictionalized look at America's" "most catastrophic fears. What if North Korea detonated a nuclear weapon in space and silenced dozens of satellites? What if an Iranian missile threatened to destroy Israel, while a Venezuelan "research" satellite endangered one of the US's most promising space initiatives? What if tech-savvy terrorist cells unleashed back-to-back horrors in California, creating an avalanche of crises overnight, as national leaders robbed of spy satellite imagery were forced to make decisions in the "blind"? These are the scenarios of "Counterspace," a frighteningly plausible look at threats to the United States and the world. Scott, Coumatos, and Birnes use war gaming scenarios to show how the US Strategic Command might choose to fight off these menaces and prevent global disaster. Combining current and future technology with our enemies' grandest plans, "Counterspace" is equally a terrifying possibility and a hopeful affirmation that America can and will be ready to face such dangers, told with the pulse-pounding power of a modern day thriller.
