Film blurs the line between myth and reality better than any other artistic medium, one could argue. Using movies to explore the unconscious realms of society in order to reach a better understanding of what drives it, this book examines filmmakers and films that center on schizophrenic themes of alienation, paranoia, breakdown, fantasy, dreams, dementia and violence, and that address--as entertainment--the schizophrenic experience. The loss of individual identity as reflected in the films is investigated, as well as the shamanic potential inherent in the broader theme.
