Frederick has created an indispensable guide for young actors, just as Frederick

himself is an indispensable guide for so many kids and adults working in Hollywood.

—Ken Baumann, actor, *The Secret Life of the American Teenager*

"Acting in Young Hollywood is a book that every aspiring actor and their parents should read. It will teach you the ins and outs of the business and show you how to find success as an actor."

—Asher Book, actor, *Fame*

The youth market is exploding in Hollywood, and there has never been a better time for young people to break into the business. Kids, teens, and anyone who can play young have greater opportunities to find success and celebrity than ever before, and *Acting in Young Hollywood* is the essential guide any young actor needs to find his or her footing on the oftentimes rocky path to fame. Covering everything from the most basic tools (headshots, reels) to a breakdown of the integral team players (agents, managers) to actually getting out there and acting (auditions and booking), this is the go-to book for anyone hoping to launch—and maintain—a lifelong career. Frederick Levy is a friend to and advocate for young performers, which is why *Acting in Young Hollywood* is filled with inspiring anecdotes, sympathetic advice, and much-needed encouragement for the future stars of stage and screen.
