This is a special break-out edition adapted from the authors widely used International Business Transactions: A Problem-Oriented Coursebook, now in its 10th edition (2009). The purpose of this volume is to facilitate a focused study of issues arising out of planning, operating and terminating foreign investments. After a brief introduction to the conduct of business in the world community, the book uses hypothetical problems to present some of the most typical and important issues arising out of the initiation of a foreign investment, as well as operational, financing and termination issues. The primary focus is on lawyers, public and private, as problem solvers.
