"City Walks Architecture: New York" deck offers the best way for visitors and adventurous locals to experience the world-renowned architecture of the Big Apple. Packaged in a redesigned deck format, 25 folding cards outline a variety of walking adventures that introduce users to such landmark architectural sites as the Empire State Building, the New York Public Library, and the Brooklyn Bridge as well as lesser-known gems like the Morgan Library & Museum, the Hudson Hotel, and the Regal E-Walk Theater. Each card includes descriptive text and detailed walking instructions on one side and a helpful map and color photograph of selected sites on the other. A tri-fold intro card provides helpful information for travelers, including information on using the deck and navigating around the city, as well as an overview map of the area.
