Essential Winetasting's step-by-step approach teaches you everything you need to know to taste wine like a professional - from how to look at and smell a wine to how to taste and assess it. The book begins with a clear outline of how to taste. This is followed by a detailed but accessible account of how wine is made and an exploration of every major grape variety and of how its wines differ around the world. Finally comes the real joy of this book - a series of nine practical tastings which illustrate the key differences in wine styles, flavours and quality. Every stage of tasting is illustrated with specially commissioned photography and there are maps of every key wine region.
