Interactive learning fun with the Sesame Street gang! Kids will have fun playing with the Sesame Street gang while developing their numeracy skills. These cards are designed to build numeracy and promote numerical activities, and allow children to discover varied number patterns. Each box contains 30 interactive slide panels written and created with teachers. The set includes a parent guide with fun skill-building activities. Each card can be used over and over again in a number of different ways to reinforce the learning experience. The interactive sliding concept is clearly demonstrated on the front of the box, and the cards come securely packaged in a sturdy flip-top box. Ages 3 to 6.
