A beautifully illustrated dictionary of 26 birds. "Birds A to Z" uses an accessible and successful format to describe a selection of 26 birds. Each page features two full-color photographs of the bird, one or two descriptive paragraphs and a fact box that provides at-a-glance details on each entry's Latin name, diet, range, length, weight,

wingspan and nest location. The 26 birds are: Anhinga Bluebird Chickadee Duck Egret Falcon Gallinule Hummingbird Ibis Jay Kingfisher Loon Meadowlark Nighthawk Owl Pelican Quail Raven Skimmer Tanager Upland sandpiper Vulture Woodpecker Xantus' murrelet Yellowleg Zone-tailed hawk. Accurate and up-to-date but with an informal presentation, "Birds A to Z" is an engaging view into the avian world.
