Amendment 9 to the Code of Safe Working Practices for Merchant Seamen provides some useful pictorial representations of various existing safety points contained within the Code: these include arrangements for working aloft, working on portable ladders, arrangements for entrances into enclosed spaces, and use of mobile work equipment and the positioning of boarding equipment. The amendment contains: the latest guidance and advice for merchant seamen; key updates relating to regulations that are now in force; additional guidance under Chapter 13 - Safe Movement; advice on the general safety principals to be followed when working on deck whilst at sea and the appropriate precautions to take whilst working at sea during heavy weather; and, clearly and concisely written content.
