With the introduction for the Certified Imaging Informatics Professional (CIIP) certification exam by the Society for Imaging Informatics in Medicine (SIIM) and the American Registry of Radiologic Technologists (ARRT), the need for corresponding reference and study material was recognized by SIIM. SIIM seeks to fill this void and provide much-needed resources for the imaging informatics community through this comprehensive volume for the working informatics professional. "Practical Imaging Informatics" is a quick reference designed to cover the content included in the CIIP certification test while also filling gaps not included by the test but useful in everyday practice.
