Grant Harper struggles to keep pace with Jason, two years older and more adept at moving across the frozen forest floor. Hours later, chilled by the intense cold, they reach their destination and in an instant that changes their lives forever, at the base of Lone Pine, Jason vanishes. REDISCOVERING LONE PINE, winner of the Maryland Writers Association Prize for Mainstream Fiction, is a work of legal fiction that will hold and entertain any reader. It is a story about being lost and then found about the challenge of making sense of the inexplicable. Shrouded in the disappearance mystery is a compelling story about our legal system and lawyering and about deep affection and lifelong commitment between friends. REDISCOVERING LONE PINE includes an extensively documented Discussion Guide that makes it perfect for use in book groups.
