The book is designed to promote student appreciation of the interaction of legal doctrines as they are applied in the white collar crime field. The material exposes students to substantive criminal law, criminal procedure, administrative procedure, corporate law, evidence, civil procedure, sentencing law, and highly specialized regulatory law. The book also allows students to appreciate the influence of administrative policies and the influence of the basic "culture" of white collar criminal practice. In addition to traditional materials in the casebook, a companion statutory and documentary supplement provides rich primary source material.
