With the increasing emphasis on textiles as a major global industry, Fabric Science, 9th Edition, continues the long tradition of meeting the needs of both students and professionals in the textile, fashion, and related industries. The best-selling introductory text is for students and professionals who need a solid understanding of

basic textiles. In this new edition, Cohen and Johnson address the effect of textiles and textile products on the environment throughout the text as well as a standalone chapter. They address the variety of career opportunities in the design, production, marketing, and merchandising of textiles, apparel, and home products associated with the world of textiles.
