Save the planet. Save your money. Have fun doing both. Anyone who can apply tape, use a glue gun, or sew on a button has enough craft knowledge to rescue a huge variety of items that would otherwise be headed for the landfill. Many of these 120+

ideas don't require any crafting experience at all, and you end up with amazing "new" furniture, accessories, and gifts that only cost you a little time and a few crafting supplies. Once you know our secrets of Renewing, Reinventing, and Recycling, you can make castoffs desirable again, either by refreshing their appearance so they can continue in their original use or by recasting them into exciting new roles. You'll have so much fun that you may forget that this way of decorating is very green!
