The most extensive English-language study of Schopenhauer's metaphysics of the will yet published, this book represents a major contribution to Schopenhauer scholarship. Here, John E. Atwell critically but sympathetically examines the philosopher's main work, *The World as Will and Representation*, demonstrating that the philosophical system it puts forth does constitute a consistent whole. The author holds that this system is centered on a single thought, "The world is self-knowledge of the will." He then traces this unifying concept through the four books of *The World as Will and Representation*, and, in the process, dissolves the work's alleged inconsistencies.
