Practicing Psychiatry in the Community: A Manual is an indispensable resource for practitioners and psychiatric residents. Clinically active psychiatrists will find this manual invaluable as they adopt new roles in this dynamic and exciting field. This comprehensive work by leading experts in the field addresses the major issues currently facing community psychiatrists. It even includes a user-friendly guide to the development of a research program in a community setting. Organized into three main sections, this manual provides essential information on treatment settings, target populations, and special topics in the community psychiatry domain. The Treatment Continuum explores the varied environments in which community psychiatric services may be offered, including outpatient treatment, crisis resolution services, and psychiatric rehabilitation programs. Populations such as mentally disordered children, adolescents, and the elderly; HIV-infected patients; the homeless mentally ill; the developmentally disabled; chemically dependent patients; dually diagnosed patients; violent patients; and the chronically mentally ill have unique needs requiring skilled clinical care. The Target Populations section provides the community psychiatrist with useful and practical guidelines for the treatment of each of these patient groups. The Special Topics section ushers the community psychiatrist into the era of contemporary community psychiatric practice with vital information on emerging issues like cultural diversity, the principles of effective collaboration with advocacy and family/self-help groups, the role of the multidisciplinary team, and legal and training issues.
