David Hume, Adam Smith, William Robertson, Adam Ferguson, Lord Kames, John Millar, James Dunbar and Gilbert Stuart were at the heart of Scottish Enlightenment thought. This introductory survey offers the student a clear, accessible interpretation and synthesis of the social thought of these historically significant thinkers. Organised thematically, it takes the student through their accounts of social institutions, their critique of individualism, their methodology, their views of progress and of moral and cultural values. By taking human sociality as their premise, the book shows how they produced important analyses of historical change, politics and morality, together with an assessment of their own commercial society.

读Smith的准备吧，没读过原著的翻翻就好，读过原著的也翻翻就好。最后一章总算有点我想看的见地。
