isbn:9780859896306

The interactive edition of "The Exeter Anthology of Old English Poetry". The CDs contain the revised second edition of "The Exeter Anthology of Old English Poetry". This is linked to a full-colour digital facsimile of Exeter Cathedral, Dean & Chapter MS 3501, commonly known as "The Exeter Book", and images of various other related historical documents. Also included is a codicological report (with images) on the manuscript's current binding. The images used in the facsimile are based upon original scans. This second edition includes recently discovered alterations to the poetic texts in addition to the 400 readings listed in the apparatus of the first edition. The commentary includes a discussion of critical works that have appeared since 1994.
