"Neuro-Ophthalmology" was developed for practitioners, residents, and students who

encounter patients with disturbances of the afferent visual pathways and efferent ocular motor systems. It contains in-depth discussions of neurophthalmic topics and disorders to help readers diagnose and manage patients. Each chapter includes an introduction to the structures or disorders discussed, followed by a review of their neuroanatomy, symptoms, and signs. A detailed discussion of the presentation, pathophysiology, diagnosis, neuroimaging and diagnostic studies, and management of the diseases which affect that structure follows.
