Product Description

Henry Sidgwick's *The Methods of Ethics* challenges comparison, as no other work in moral philosophy, with Aristotle's *Ethics* in the depth of its understanding of practical rationality, and in its architectural coherence it rivals the work of Kant. In this historical, rather than critical study, Professor Schneewind shows how Sidgwick's arguments and conclusions represent rational developments of the work of Sidgwick's predecessors, and brings out the nature and structure of the reasoning underlying his position.
