This excellent new title is set to become the first point of reference for all practitioners dealing with children's soiling problems. The author produced this book with the intention of helping the inexperienced practitioner to become more confident in dealing with these clients. The book is aimed at School nurses, health visitors, child branch nursing students, paediatricians and GP's and is designed to be a book can be read front to back, but can also be 'dipped into' when help on a particular aspect of management is required.
