This handy reference gives health professionals the basic tools needed to communicate with Spanish-speaking patients. Vocabulary lists and sample dialogs address situations commonly encountered in hospitals, clinics, physician's offices, or outpatient and community centers. It familiarizes readers with common words and phrases through consistent repetition and demonstrates how they are used in conversation. Questions that can be answered with a "yes" or "no" response are emphasized, designed to facilitate communication in emergency situations where rapid responses are needed. Pronunciations are provided both in the text and on an accompanying CD-ROM.
