A perfect introduction to funny games for young children(of 4 years+). It is an ideal book to prepare them for school and complements their work at kindergarten. Children learn to count from 1 to 10, and to read and write while playing. There are wonderful colored pictures on every page: children are invited to spot the differences, put together, circle around, count, add, subtract, observe, color after breaking the color code, write following a pattern, etc.
