isbn:9780778723776

Following insects from egg to adult, Insect Life Cycles outlines the amazing changes different species of insects go through before they become fully-grown. Full-color photographs and detailed illustrations of insects, from the familiar to the exotic, are featured. Topics include- incomplete and complete metamorphosis- where insects lay their eggs- what growing nymphs and larvae eat- how they find food- how nymphs and larvae protect themselves from predators- how insects molt
