This life-changing book will help you (or someone you know) to stop drinking and be healed. It incorporates your mind, heart and soul. Life is a journey and through faith, each step can be your best foot forward. By applying its principles, your drinking will be significantly reduced and then stopped altogether. Researchers and independent studies have reported that those who have struggled with alcohol and participated in AA and other 12-step programs, have been successful, however, only within a small segment of the population. Here is your chance to live the rest of your life more abundantly.
