T. F. Torrance is widely regarded as the most significant British academic theologian of the twentieth century. He is especially noted for his ground-breaking contribution to the study of the relationship of Christian theology and the natural sciences. He is unquestionably one of the most prolific of theological writers and is the most senior member of the nearest thing to a 'theological dynasty' that Great Britain has ever produced. Here, Alister McGrath, himself one of this country's leading theologians, traces the development of Torrance's theological thought and provides a comprehensive account of his life and career. Particular attention is paid to the important role played by Torrance in the English-language reception of the theology of Karl Barth, and to his pioneering engagement with the relation between theology and science. While making extensive reference to Torrance's published works, McGrath also draws on important unpublished writings and private papers. The book contains many unpublished photographs, together with a complete bibliography of Torrance's works.

作者介绍:

目录: Photographs and Maps

Introduction

Part One: The Emergence of a Scientific Theologian

1. Childhood: Sichuan, China: 1913-27
