"Our New York" is a lush photographic celebration of the beauty and diversity of the Empire State. With charming towns three centuries old and millions of acres of natural

wilderness, New York offers something for everyone. Photographer Carl Heilman traveled from the tip of Long Island to the rim of Niagara Falls, and from the bright lights of New York City to the dramatic wilds of Adirondack Park, to highlight the state's numerous attractions. "Our New York" presents popular tourist destinations and out-of-the-way treasures to provide a complete and stunning portrait of the state's history, its beauty, and its life.
