Learn dementia care from an experienced colleague! From a senior faculty member of the Copper Ridge Institute comes peer-to-peer guidance on how you can give the best possible care to dementia patients and their families. Part of McGraw-Hill's "Nurse to Nurse" series, this title includes PDA download of the entire text, vignettes, nursing alerts that feature just-in-time information on complex or particularly important aspects of patient care, and Therapeutic Dialogue Boxes that provide nurses with specific communication solutions for both patients and their families. Coated flex-binding repels stains. This title features: dementia basics; common complications of dementia; assessment of dementia; caregiving basics; common problems in daily care; managing behavioral problems; designing activities; and, helping families. The new "Nurse to Nurse" series is specifically designed to simulate the teaching experience from which nurses learn best: trusted mentors carefully explaining what they must do in specific clinical situations. Written in a consistent, single-author voice, each book in the series brings the wisdom and experience of some of the foremost experts to non-specialist nurses in clinical care.
