isbn:9780443101540

This title is directed primarily towards health care professionals outside of the United States. Now revised and fully updated in line with developments in nurse education, this fourth edition will prove indispensable to pre-registration nursing students on the

Common Foundation Programme. It provides an essential guide to working in health care settings and prepares them for entry to their chosen branch programme. It will also be of relevance to other health care professionals such as health care assistants.
