This book offers the first in-depth, fully-researched analysis of the career of Stanley Baker, one of the most significant cinema figures to have come out of Wales and sheds considerable light on the image of Welsh national identity and masculinity which he projected. Stanley Baker is one of only a handful of Welsh-born actors to have become a major film star. Like his friend Richard Burton, his rise to fame took him from an impoverished childhood in the valleys of south Wales to international stardom in films such as *Zulu* and *Accident*. As well as being an important figure in front of the camera, he became a producer and film executive as well, whilst never losing his strong links with his Welsh background.
