Over the past twenty-five years debate surrounding cultural diversity has become one of the most active areas of contemporary political theory and philosophy. The impact of taking cultural diversity seriously in modern political societies has led to challenges to the dominance of liberal theory and to a more serious engagement of political theory with actual political struggles. This 2007 volume of essays by leading political theorists reviews the development of multiculturalism, surveys the major approaches, addresses the critical questions posed and highlights directions in research. Multiculturalism and Political Theory provides an overview for both students and researchers.
