The new edition of this popular text offers an accessible introduction to 23 of the key theorists of Sociology. Four new chapters consider the work of Theodor Adorno, Michael Mann, Dorothy Smith and Zygmunt Bauman, alongside updated material throughout other chapters. Informative contents pages provide a unique reference tool, whilst the innovative 'Seeing Things Differently' sections demonstrate how theory can illuminate aspects of contemporary social life. With updated 'Legacies' and 'Further Reading' sections, and extended glossary boxes, this book is an indispensable tool for all students seeking to broaden their understanding of social theory.
