Expanded with coverage of today's most critical topics and written by more than 90 physician experts, these two volumes comprise the third edition of the core text for certification in neurodevelopmental disabilities in pediatrics. In Volume I, students and professionals will get extensive information on the scientific basis of disability, etiologies, assessment, and practice issues. Then, in Volume II, readers will explore more than 2 dozen specific disorders, and the latest assessment and intervention strategies for each. These editions now include- sections focused on autism, learning disorders, and attention disorders- 13 new chapters on critical topics such as neuroimaging, Turner syndrome, Rett syndrome, neurochemistry, and molecular genetics- more contributors from a broader range of disciplines, including epidemiology, radiology, and audiology
