This Fall Checker Book Publishing marks the upcoming 50th anniversary of an American cartoon icon, B.C. by Johnny Hart. Features strips hand-picked from the master himself prior to his death in April 2007. This collection, which celebrates the half-century love affair America has with the introspective caveman community, features rare and never before published concept art for the strip and a compendium of each individual decade. GrowinGold With B.C., A Celebration of Johnny Hart collects the Reuben Award-winning strip more comprehensively than ever before. Thor, Wiley, Ida and of course B.C. himself are all here in one hilarious birthday party for one of America's most enduring comic strips.
