This title is directed primarily towards health care professionals outside of the United States. The book shows nurses why they are doing what they do rather than just how for a wide range of conditions presenting in the emergency department. Potential

problem areas such as paediatrics and treating the mentally ill patient in the emergecny department are also covered. It has A&P sections to help practitioners to refresh their knowledge. This book is the authoritative guide to the clinical and professional needs of emergency nurses caring for patients across the lifespan.
