This title in the Rapid Diagnosis in Ophthalmology Series presents a wealth of full-color images - along with differential diagnoses - in side-by-side page layouts to assist you in identifying a full range of neuro-ophthalmic disorders. A templated format expedites access to the guidance you need to diagnose the most common conditions related to Neuro-Ophthalmology - from simple to complex - encountered in practice.

Coverage of cutting-edge topics including transient visual loss, congenital and acquired optic neuropathies, chiasmal and retrochiasmal vision disorders, nystagmus, and many more, help you keep your knowledge up to date.

Hundreds of full-color images present conditions as they present in real life.

Common diagnostic pitfalls discuss what to look out for when making a difficult diagnosis.

A templated, color-coded layout and differential diagnosis boxes for each condition help you make quick, accurate clinical decisions.

A focus on the most common conditions encountered in practice allows you to efficiently formulate treatment plans and referrals.

SERIES EDITORS: Jay S. Duker, MD, Director, New England Eye Center, Vitreoretinal Diseases and Surgery Service; Director, Pediatric Retinal Referral Center, Uveitis & Immunology Service; Professor and Chair of Ophthalmology, Tufts University School of Medicine, Boston, MA and Marian S. Macsai, MD, Chief, Division of Ophthalmology, Evanston Northwestern Healthcare; Professor and Vice-Chair of the Department of Ophthalmology, Feinberg School of Medicine, Northwestern University, MI
