出版时间:2007-11-19

装帧:Paperback

isbn:9780123738745

Providing easy-to-access information, this unique sourcebook covers the wide range of topics that a researcher must be familiar with in order to become a successful experimental scientist. Perfect for aspiring as well as practicing professionals in the medical and biological sciences, it discusses a broad range of topics that are common, yet not traditionally considered part of formal curricula. The information presented also facilitates communication across conventional disciplinary boundaries, in line with the increasingly multidisciplinary nature of modern research projects. It is perfect for students with various professional backgrounds providing a broad scientific perspective. Easily accessible, concise material makes learning about diverse methods achievable in today's fast-paced world. Extensive online resources include further reading suggestions, data files, statistical tables, and the StaTable application package.
