Only recently have theologians begun to think and write about the ecological crisis in a focused manner. It is clear, however, that people of faith must come to grips with that crisis and find a way of thinking about it in the context of their beliefs. In this book, Willis Jenkins offers an introduction to Christian environmental ethics. Following observations of lived environmental theologies, he argues that they often draw on concepts and metaphors of grace, thus placing environmental issues within Christian experiences of salvation. Jenkins therefore surveys major strategies of Christian environmental ethics by mapping them onto major traditions of grace and uses this new map to explore afresh the ecological dimensions of three distinctive theologies of grace.

将宗教世界观和环境保护联系起来的研究在近年来越来越多，其中Jenkins这一本十分突出。本书先是总结了从基督教世界观出发的三种谈论信仰和环境保护的策略，包括环境公正，“神指派人作天地的管家”，以及环境的属灵。第二部分则是着重于从历代重要神学领袖的学说中提取他们对环境与人的关系的态度，这些领袖包括阿奎那，汤马斯，卡尔巴斯，耶稣基督，马克西姆斯，以及布尔加科夫。最后的结论落于呼吁更新对救赎论的叙述上，并且在更加以社区为中心，而不是单单是从个人与神的关系上，扩大“恩典”的内涵。
