著者:Heck, Peter 编

出版者:Springer

出版时间:2016-11-2

装帧:Hardcover

isbn:9783540360155

This guidebook gives a comprehensive introduction into the optimization of energy and material systems, i.e., companies, cities, and counties. It combines the fields of ecology, management, technology and microeconomics. So the book offers the theoretical background of material flow, it explains how to apply material flow management and encourages the reader to develop new material flow management projects. An interactive web-based e-Learning tool will complete the book.
