Being served with a lawsuit wouldn't just ruin your day. It could ruin a clinician's professional and personal life. Written for physicians by physicians, this important book concisely and pragmatically answers many of the questions surrounding medical malpractice. With an emphasis on clinical matters and a minimum of "legalese", this book shows ophthalmologists how to avoid law suits in the first place. It also examines what happens should litigation occur and provides insights into both defendant and plaintiff perspectives. Covering the legal issues for all of ophthalmology, here at last is a book that provides the busy clinician with the tools necessary to reduce the risk of lawsuits.
