装帧:Hardcover

isbn:9780849379666

Extensively updated to reflect the most recent changes to the All Appropriate Inquiries Rule (the 'Rule') and the ASTM Environmental Site Assessment Standard (the 'Standard'), "Environmental Site Assessment Phase 1, Third Edition" provides a valuable guide to the techniques of performing Phase 1 site assessment. Promoting a better understanding of the rationale and processes necessary to protect those stakeholders associated with a property, this book describes the latest methods used by leaders in the industry and emphasizes the development of an easy-to-follow investigative strategy for performing in-house assessments. Equally informative as an introduction for those new to the field and as a quick reference guide for experienced practitioners, this third edition reviews investigative tools mandated by the Rule, as well as many that are not. It presents the recommended searches pertaining to petroleum and petroleum product concerns as covered by the Standard, and expands on the hazards associated with construction. The author reviews the legal issues involved in the purchase of property and an historic overview provides context and a sense of the evolution of the field. Chapters outline the assessment process from beginning to end in an organized, step-by-step manner. The book describes investigations of the physical setting, historic usage, property and area reconnaissance, building materials, and industrial activities associated with a property. It also gives tips on interviewing, lists regulatory agencies, and considers special resources such as wetlands and buildings with historical value. Whether you are actively involved in the performance of site assessments or simply want to be better informed when purchasing property, "Environmental Site Assessment Phase 1, Third Edition" is an important resource on a wide range of investigative tools.
