This first book in the unprecedented "SuperCrit" series examines Cedric Price's

groundbreaking "Potteries Thinkbelt" project from the 1960s. Highly illustrated and with contemporary criticism, this is a book not to be missed! "Potteries Thinkbelt" was Price's plan to create an innovative high-tech educational facility in the North Staffordshire Potteries, which would've rivalled the contemporary new universities. The project featured moveable classrooms and was accepted for consideration by the government, although nothing ever came of it. In "Cedric Price: Potteries Thinkbelt" you can get involved, hear the architect's project definition, see the drawings and join in the crit. This innovative text is an invaluable resource for any architecture student and an inspiring record of this fascinating project.
