"Sediments and Ecohydraulics" is comprised of papers submitted to the 6th International Conference on Cohesive Sediments (INTERCOH 2005) held in Saga, Japan, September 2005. The papers are divided into two major categories. The first is basic processes, including erosion, settling, flocculation, and consolidation. The second major category is application of the understanding of cohesive sediments to address specific issues, including waterway and port management, fluid mud behavior, and contaminated sediment management.
