This book aims to connect and integrate classical acupuncture therapy and contemporary medicine. Based on updated reviews and systematic analyses, the meridians are actually systems of physiological and pathological reflexes in the body,

and acupuncture therapy is a type of reflexotherapy. The systems methodology, together with the authors' clinical expertise of 40 years, is applied to raise the reproducibility of effectiveness in treating various indications of acupuncture, especially intractable cases. Incisive and concrete theory and technique descriptions, a novel systems approach, and many case studies are included.
