Interdisciplinary Education in the Age of Assessment addresses a prevalent need in educational scholarship today. Many current standards-driven curricula follow strict subject-specific guidelines, leaving educators little room for interdisciplinary innovation. This book gears itself toward developing assessment models specific to interdisciplinary education, positioning itself as a seminal volume in the field and a valuable resource to educators across the disciplines. Each chapter covers a major subject area (literacy, science, math, social studies, bilingual education, foreign language, educational policy) and discusses methods of assessing integrated/interdisciplinary curriculum and instruction.
