During the nineteenth century, Britain became the first gaslit society, with electric lighting arriving in 1878. At the same time, the British government significantly expanded its power to observe and monitor its subjects. How did such enormous changes in the way people saw and were seen affect Victorian culture?

To answer that question, Chris Otter mounts an ambitious history of illumination and vision in Britain, drawing on extensive research into everything from the science of perception and lighting technologies to urban design and government administration. He explores how light facilitated such practices as safe transportation and private reading, as well as institutional efforts to collect knowledge. And he contends that, contrary to presumptions that illumination helped create a society controlled by intrusive surveillance, the new radiance often led to greater personal freedom and was integral to the development of modern liberal society.

The Victorian Eye's innovative interdisciplinary approach—and generous illustrations—will captivate a range of readers interested in the history of modern Britain, visual culture, technology, and urbanization.

书评

Otter的这本The Victorian Eye属于一个更大的学术谱系。Otter的老师是曼彻斯特大学的Patrick Joyce。Joyce在2003年出版的The Rule of Freedom里面就用福柯治理术的概念来讨论19世纪中叶英国城市的市政技术进步和自由化治理（liberal governance）的关系。而Joyce这个路数也是90...
