subject: Environmental Philosophy, Environmental Theory, Environmental Studies, Philosophy, Psychology, Religion, Science and Technology, Spirituality, Science and Society

Gregory Bateson (1904–1980), anthropologist, psychologist, systems thinker, student of animal communication, and insightful environmentalist, was one of the most important holistic thinkers of the twentieth

century. Noel G. Charlton offers this first truly accessible introduction to Bateson's work, distilling and clarifying Bateson's understanding of the "mind" or "mental systems" as being present throughout the living Earth, in systems and creatures of all kinds. Part biography, part overview of the evolution of his ideas, Charlton's book situates Bateson's thought in relation to that of other ecological thinkers. This long-awaited volume opens up this challenging thinker's body of work and introduces it to a new generation of readers.

作者介绍:

Noel G. Charlton has enjoyed work in commerce and industry, school teaching, small holding and house restoration in Scotland, antinuclear activism, wild species preservation, residential community life, and research and study in university and college settings. These experiences have been unified by a deep concern for the natural world and a growing conviction of the spiritual and religious significance of the whole of the living planet.
