isbn:9780443103759

This fully updated second edition builds on the success of the first book, basing the revision material around diseases rather than questions. It provides MRCP candidates with a systematic and succinct summary of the signs, symptoms, differential diagnoses and investigation results for over 100 of the most common diseases that come up regularly in Part 2 of the MRCP exam. There are also over 160 sample questions and answers to help candidates experience a 'mock' exam and test their knowledge.
