Environmental Science: Fundamentals and Applications is an applied science textbook written for a high school audience. It provides practical instruction in the sciences that

address principles related to the environment. Chapters include topics such as natural resource management, fish and wildlife management, aquaculture, soil science and forestry. It addresses basic principles of science as they relate to outdoor environments, providing numerous examples of applications of science to environmental problems. The textbook is illustrated with many colored photos, sketches, diagrams, and tables. Chapters include objectives, evaluation materials, suggested class activities, and key terms. In addition, Internet key words are provided throughout the text to guide in-depth Internet study.
